PROFILE

Junior Java developer with hands-on experience building full-stack and microservices applications using Spring Boot, MySQL, React, and Docker. Skilled in designing REST APIs, securing them with Spring Security, and testing with JUnit and JMeter. Familiar with CI/CD using Jenkins and Kubernetes basics. Seeking a junior backend role where I can learn from a team and write clean, maintainable code.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Backend: Spring Boot, Spring MVC, Spring Data JPA, REST APIs, Microservices

Frontend: React, Thymeleaf, HTML, CSS, Tailwind CSS

Database: MySQL, PostgreSQL, MongoDB

API Documentation: Swagger UI, OpenAPI

DevOps and Tools: Docker, Kubernetes (Basic), Jenkins (CI/CD), Git, GitHub, Postman

Testing: JUnit, JMeter, Cucumber, Mockito, Acceptance Testing

EDUCATION

Bachelor of Science (Mathematics) 2019-2024
Yangon University of Distance Education

Advanced Certificate in Information Technology 2020
Software Engineering | NIIT India.
GPA: 3.75

Honors Diploma in Information Technology 2023
Software Engineering | NIIT India.
GPA: 4.0

Advanced Diploma in Information Technology 2024
Software Engineering | NIIT India.
GPA: 3.75

PROJECT EXPERIENCE

Online Bookstore Management System

2025

FullStack Developer | Java · Spring Boot · MySQL

GitHub: https://github.com/bhonepyaehmuee/bookstore-spring-boot

- Built a full-stack Spring Boot MVC app with Thymeleaf views and a layered Controller–Service–Repository architecture
- Used Spring Data JPA / Hibernate with MySQL; modeled entities with @ManyToMany (Book–Author) and @OneToMany relationships
- Secured the app with Spring Security and BCrypt password hashing; implemented session-based login and cart state
- Wrote JPQL and native SQL queries for search, filtering, and sales reports, with pagination and sorting
- Handled file uploads and generated Excel reports with Apache POI
- Packaged and containerized the app with Maven and Docker (Java 21)

Consultant Booking System

CURRENTLY

Backend Developer | Java · Spring Boot · MySQL · Docker · Kubernetes

- Designed a microservices architecture with separate User, Consultant, Booking and Notification services, each owning its own MySQL database.
- Built REST APIs with Spring Boot for registration, consultant search, availability management and appointment booking.
- Prevented double-booking by validating time slots in the Booking service before saving.
- Secured the APIs with Spring Security and JWT-based authentication.
- Containerized every service with Docker and deployed them to a local Kubernetes cluster.
- Automated build, test and Docker image creation with a Jenkins pipeline.
- Measured response times and found bottlenecks with JMeter load tests.
